

CYBER SECURITY & INFO TECHNOLOGIES

Changing Threat Environment and Challenges in Cybersecurity

MAY 31, 2022

Orion Policy Institute hosted a live webinar on the changing threat environment and challenges in cybersecurity.

The speakers included:

Dr. D. Kall Loper, Vice President of Digital Forensics and Incident Response at Herjavec Group/Fishtech Group

Mehmet F. Bastug, Assistant Professor at the University of Scranton

Reza Montasari, Senior Lecturer in Cyber Threats at Swansea University (Moderator)

In this event, we discussed the concept of identity in modern network investigations, cyberspace including the tools and services on the dark web, the types of cyber attacks, cyberterrorism, and countering cyberterrorist attacks. Our panelists also touched upon the need for new regulations and potential solutions such as improving the capabilities of domestic law enforcement agencies and addressing individual susceptibilities.
